## U.F.A. Meeting Votes Against Social Credit

Tom Down Aberhart Plan By  
Big Majority

By a vote of 370 to 30, Alberta farmers assembled in annual convention in Calgary last week turned down the Social Credit plan as proposed by Mr. Aberhart, for this province.

Mr. Gardiner M. P. president of the U.F.A. for the fifth term took the stand that the Alberta plan of Social Credit was "not feasible" under present conditions so far as Alberta is concerned. As the vote on this question was given by ordinary farmers from all parts of the province and after they had heard Mr. Aberhart address the gathering on this subject, it can reasonably be taken for granted that the Aberhart Social Credit plan is not meeting with the approval of the rural districts which we had been led to believe.

No doubt the plan was studied from all its angles more thoroughly at this meeting than ever before, as so much depended on the decision arrived at. For this reason the almost unanimous conclusion reached should have a dampening effect upon its advocates.

## Mounties Have Tough Time During Storm

20 Mile Drive With Team to  
Get Assaulted Man

Mounted Police from Medicine Hat had a tough trip last Friday night in answer to a call from south of Suffield where M. A. Villi had been assaulted by a neighboring farm hand. It appears the neighbor his Mr. Villi on the head with a hammer and Villi managed to get to his home on J. J. Bowen's Suffield ranch, of which he is foreman.

Mrs. Villi (nee Lela Pinder formerly of Redcliff) drove 6 miles in 26 below zero weather and phoned for the Mounties. Polesman Dan Taylor and B. Crockett started out for the scene by motor but had to abandon the car and drive 20 miles by team to their destination. Villi was taken to Medicine Hat for medical treatment where it was found his wounds were not serious.

As far as arrests have been made.

Owing to the unfavorable weather for the past two weeks the Little Theatre monthly meeting for January has been delayed. A program is already arranged, however, and as soon as weather conditions improve members will be notified of the date of the gathering which will be held in the Parish Hall.

Plans are now under way for another public entertainment to be put on by the Little Theatre Association. Three one-act plays have been selected and the characters will be cast at once. The date for the entertainment has not yet been set but will probably be within the next three weeks.

## Football Club is Organized for Season

Another Meeting is Called For  
January 29th

At a large gathering of football fans held in the Armouries on Monday it was unanimously decided that a football club be organized for the season 1935, and called the Redcliff United Football Club.

The following officers were elected:

Honorary Presidents: R. S. Hodge, H. G. Chesley, C. Buchholz. Active executives: Rex Ross, R. Phillips, A. MacCall, Fairhurst, A. E. Shaw, W. Wilts and G. Davies.  
Social Committee: W. Lawton, N. Willis, S. Patterson, A. Klemm.

A general football meeting will be held in the Armouries on Tuesday Jan. 29th when a President, Vice President and Secretary-Treasurer will be chosen from the Active Executive for the season's operations.

This meeting will be held at 9 o'clock sharp.

## Soil Drifting Committee is Appointed

Will Meet to Organize and  
Prepare Plans

For the purpose of studying the problem of soil drifting and making such recommendations as they feel necessary to the provincial government for meeting the problem, a special committee has been named by Hon. J. S. Griedle, minister of agriculture, who announced the formation on Tuesday.

The committee will include O. L. Lomman, provincial fish and game commissioner; E. L. Grav, deputy minister of agriculture; and former field crop commissioner; Dr. F. A. Wyatt, soil expert of the university. Mr. P. J. Craig, district agriculturalist at Lethbridge; L. Kool, Monarch; J. J. Strang of Tresholm and A. C. B. Greer of Murrin.

A meeting of the committee will be held shortly to organize and prepare a plan of operation.

## Churches

ST. AMBROSE CHURCH  
Rev. H. S. Hammett, Vicar.  
3rd Sunday after Epiphany  
January 27th 1935.

9:30 a.m. Holy Communion.  
11:00 a.m. Choral Eucharist.  
Evening 7:30.

Conformation classes will commence next week.  
Conformation on March 3rd.

JORDON MEMORIAL  
(UNITED) CHURCH

Pastor: Rev. R. Brinkley  
10 a.m. Church School.

11:15 a.m. Morning Worship  
Subject: "Overcoming evil with Good"

7:20 p.m. Evening Worship  
Subject: "A Young Man that loved his Strength"

"My times are in thy hands."

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

ROBERT GARDNER M. P.

For Acadia who was again elected President of the U. F. A. for the fifth term, at the convention last week.

## This Week at Ottawa

Ottawa, January 17th 1935

The final session of the 17th Parliament was opened to-day with the historic and picturesque ceremony which has marked the formal opening of British Parliaments for more than six centuries. The personal representative of His Majesty King George V came to the Hall surrounded by men-at-arms in colorful uniforms and great crowds gathered to view the proceedings.

The scene within the Senate Chamber was one of impressive levity. There were seen the scarlet and ermine of the Supreme Court judges, the brilliant uniforms of the officers of high rank in the defence forces and the beautiful and costly robes of the ladies.

In the House of Commons, Mr. Bowman of Durham, was elected to fill the high office of SPEAKER. The five new members were introduced amid great applause. Sir William Mulock, who is 91 years old was present to see his grandson take his seat on the floor of the House. This grand old man who entered Laurier's Cabinet in 1896 is wrinkled and whitened with age but still stands erect and seems to be in good health.

With an election in the offing the session will be spectacular and already the spirit of conflict and battle is in evidence.

The Speech from the Throne gives notice that Mr. Bennett's Reform Programme will be put into legislation. Notice is given that regulations will be enacted to modify the Capitalistic System and to remedy the social and economic injustices now prevailing. Changes will be made in the Marketing Act and in the Farmers' Debt Arrangement Act. Provision will be made for the security of workers during unemployment, sickness and old age. Long term and intermediate credits will be made available, the Maritime Provinces will be given more help, surveys will be made of the drought stricken areas of the west and minimum wages maximum working hours will be arranged for labour.

The consumer and producer will be protected against unfair practices, the investor will be guarded, the Civil Service will be re-organized and penitentiaries will be investigated and the English "Borstal System" introduced.

F. W. Gershaw

## BANFF BEAUTY WINTER QUEEN

Showering behind a fast running torrent, rushing with a team of huskies, skidding on the mountain trails all come under the heading of real sport, according to Miss Dorothy Stoddard, who reigns this year during the winter sports season in the Canadian Rockies. Visitors from many United States cities as well as from Canadian centers are enjoying all the thrills which only this area can provide, and which reach a peak during the annual Banff Carnival held this year January 15-17 inclusive.

## Agriculture Must Have Greater Authority

Days Premier Bennett in  
His Radio Talks

Those who have been so insistently advising farmers to ahead with their production and leave the marketing to others, to forget all the ideas of the price obtainable for their products because all efforts to affect prices are fruitless, received a sharp rebuke from Premier R. B. Bennett in one of his radio talks.

"Objection comes from people who cannot adjust themselves to changed conditions," the Premier said, referring to the National Products Marketing Act. "There are interests which distrust and fear the farmers' organizations just as in the last century there were interests which depreciated the growth of labor unions—I believe it is essential to the dignity and power of the great farming community of the land that agriculturists should have a greater measure of authority over the sale and distribution of their products."

Last night about midnight a change came in the weather. A chinook blew up from the south and although the loose snow was drifting in all directions the thermometer jumped rapidly and by morning considerable snow had disappeared. Shortly after daylight, however, the wind shifted to the north and was slightly colder. At the time of going to press the weather is very undecided. Should it turn cold now the prairies would become a mass of ice making it had going for ranch cattle. Reports from Calgary this morning state it is freezing hard there.

See our special cubbing offers on

## Heavy Snow Storm And Cold Weather

Are General in All Directions  
This Week

Heavy snow falls for this week have made the roads impassable and the thermometer has hovered around from 30 to 35 below zero for the past week.

About 18 inches fell on the level and in some sections drifted six feet high piled up.

The storm and the cold weather are the worst in five years, and is not confined to Alberta but are general in all directions. Two feet of snow in Vancouver forced the closing of the schools and several trains from the west were cancelled.

## Rules Governing The Marketing of Eggs

Issued By Poultry Marketing  
Board, Edmonton

Producers of grade A 1 eggs who comply with the requirements of the Federal department of Agriculture egg grading regulations and who sell their eggs direct to consumers will not be effected in any way by the adoption of the proposed Alberta Poultry marketing Plan, under the, Natural Products Marketing Act.

Producers of Grade A eggs, as specified in the Federal regulations, will also be at liberty to sell direct to consumers under the proposed poultry plan, the only requirements in the case of these producers being that they shall secure permits from the Alberta Poultry marketing Board.

This policy towards these important sections of the poultry producing industry was laid down by the board members during a three-day session in Edmonton last week.

Additional protection for the poultry producers has been created in the proposed poultry plan in connection with this phase of production, and it is now definitely specified in the plan that permits by the board cannot be unreasonably withheld.

In order to eliminate criticism of the manner of registering poultry producers and the conducting of a ballot among them on the proposed marketing measure, the Federal Marketing Board at Ottawa is taking the responsibility of conducting both registration and the ballot thus relieving the Alberta Marketing Board of any suspicion of prejudice in the conduct of these two important steps.

It is anticipated the ballot will be taken in the course of the next few weeks and in the interval adequate steps to acquaint all poultry producers with the terms of the proposed marketing plan will be taken by the Alberta Poultry Marketing Board.

## AUTO LICENSES WERE INCREASED LAST YEAR

Total motor vehicle licenses issued in 1934 were 88,497, of which 73,114 were passenger cars and 15,383 were trucks. Gasoline revenue for 1934 was \$2,555,569 compared with \$2,222,922 for 1933.

## Unemployment Insurance is Now Assured

Would Provide \$12.00 Weekly  
For Family of Five

The system of unemployment insurance, which the federal government is providing for in legislation to be proceeded with this week is not designed to take care of all the obligations of a person thrown out of work, but rather to help out. Broadly speaking, it is understood, a man with a wife and three children would receive about \$12.00 a week.

In order to qualify for these payments it would be necessary to contribute to the fund for a period in excess of one year, although the period in which these fits may be derived would be somewhat proportionate to the period of contribution. The age and the sex of the contributor are also taken into consideration.

The benefits of the insurance scheme are not to be applied for individuals. Instead it will be automatic in its application to industry in general. An exception could be made probably, in the case of people who already have the protection of an allowance in times of unemployment, many trade unions having such provision.

It is understood that the measure contemplates future contributions, further than those which now prevail, when so many people are out of work and are not in receipt of any wages from which the qualifying deductions for unemployment insurance could be made.

## U. F. A. and Labor Turn Down C. C. F.

Each Organization will Support  
Own Candidate

There will be no C. C. F. candidates in the coming provincial general elections in Alberta so far as organized Labor and organized U. F. A. farmers are concerned, according to Labor delegates in Lethbridge attending the annual convention of the Alberta Federation of Labor.

A meeting of executives of organized Labor and the U.F.A. was held in Calgary when it was decided that each organization would support its own candidate in the next election, co-operating, however, in the various ridings where their interests touch.

The decision is in keeping with the findings of the recent U. F. A. Caucus in Edmonton, when proposals to merge the identity of the U. F. A. in the C. C. F. were turned down.

According to reports prospects are good for another new industry to be started in Redcliff in the near future. Let us all come.

The annual ratepayer's meeting will be held in Cliff Hall on Friday Evening, Jan. 25 commencing at 8 o'clock when Council and School board members will review the town's business for the past year.

How is your subscription?

## Palestine Is Prospering

Country Is Engaged In Extensive Building Program

The following article appeared in *Mercure de France*, Paris:

Palestine produces wheat, olives, peaches, almonds, etc. The grapes of Hebron, the peaches and apricots of Bethlehem and Hebron, the Jaffa oranges, the pomegranates, figs and olives from all districts, are famous throughout the world.

But the Jews are not only tillers of the soil, they have become profitable builders as well. The great Jordan dam is an engineering feat that has given Palestine a sufficient supply of electric power for light and industrial purposes. The rail is ferried with roads and an internal "bristling activity is going on in every small town."

In a few months the Jewish population of Jerusalem increased from 60,000 to 100,000. Last summer at least 15,000 German Jews settled there and the influx has continued since then. Most of the newcomers are intellectuals. There are at least two hundred Jewish physicians in Jerusalem, but as there is no worth for all of them, they manufacture consent or work as macons, while former chief engineers keep service stations and university students run window-cleaning and floor-polishing businesses.

Jerusalem has had to put itself in order to receive this wave of new arrivals. Until then there was no water supply in the city, except well and water was used by ambulant vendors. Now it has a water supply that can rival that of any other big city.

A new residential center is rapidly springing up on the outskirts. Five years ago that district was a garden desert. It is now developing into one of the most lovely residential districts. Every villa is surrounded by magnificent flower gardens and groves of cypresses, eucalyptus and other sub-tropical trees and shrubs.

Haifa, formerly a poor fishing village has become Palestine's second most port. It is also an important industrial center for the manufacture of soap and cement. The extraction of peat and other minerals from the Dead Sea is giving satisfactory results. Against expectation, Palestine's best customer is not England, until lately, Germany ranked first among the importers from Palestine, then came Italy, Czechoslovakia and Japan.

About one-sixth of the ground is at present in Jewish hands and of this one-third is the property of the Jewish National Fund. Its value has increased enormously and the big Arab landowners are those who benefit most from it. The Jews are at estates at prices that exceeded their most daring dreams and with this money they bought even larger estates more in the interior, in Transjordan, Irak and Syria.

Such a gathering of Jews from all parts of the world, speaking different languages, necessarily brought the Hebrew renaissance. Hebrew is now one of the three official languages, along with English and Arabic. It is heard everywhere, even in the numerous theatres and movies. It is not, of course, the solemn language of ancient Hebrew, but the modern Hebrew language elaborated by the Zionist Academy, on the basis of the language spoken by the prophets and patriarchs, as a link between the Jews of Palestine. It is hoped that it will gradually take the place of the Hebrew yiddish, which is a vestige of the ghetto. Its principal agricultural institutes for girls, instruments of propagation, are two high and kindergarten, one hundred grade schools, the Hebrew University of Jerusalem, the Rabbinical Seminary and several other educational institutions.

### School For Churchill

Old Bushmills Will Be Remodeled Free By Citizens

Churchill will get his first school this winter when the old Carlton Hotel No. 5 Bushmills has been remodeled and finished inside by citizens who have mutually agreed to do the work gratis.

The lumber and material were purchased for the settlement by the provincial government.

There are at present about 100 children of school age at Churchill, while others attending school at The Pass and elsewhere will return home to attend when the school opens.

Mr. Mack-I wonder, Mrs. Mack, if I could borrow your rug-bag?

Mrs. Mack-I'm sorry, Mrs. Mack, but I don't get home till 6 o'clock.

W. N. 1929

## Positive Cancer Treatment

Optimistic Message Given By Noted Canadian Radiologist

Infallible in cases reported in time, methods of positive nature for the treatment of cancer are available at present, Dr. J. E. Goodhead, noted radiologist of the Chirac school and director of Montreal's Radiation Institute, declared in a message, the optimistic contents of which he hoped would have a lasting impression upon the Canadian people.

"We do not have to wait for supposed new discoveries or new microscopic action," he stated.

"We have at present methods of treating the disease which are a great deal more effective than any other means likely to be devised for many years to come."

Dr. Goodhead's next statement is significant of a belief in the efficacy of surgery and radiation—radium and X-rays—he wished more people shared with him, "Here at the Institute we can cure 25 per cent. of all cases which we see—regardless of what stage they are in—and if the public and physicians co-operated by reporting cases in their early stages we could reverse this ratio to 70 per cent. of the cases," he stated.

He deprecated "the great race of scientists who make announcements of new discoveries before their colleagues get to see any result save premature reports which are never borne out in fact."

Dr. Goodhead, Dr. Goodhead continued, is to make the public "vaccinized" in such a way that the belief that greater stigma attaches to cancer than to any other malignant disease will disappear. In this connection he said cancer statistics tend to compile in Canada because many surgeons and "vaccines" so relative of cancer victims "may feel eager."

His attitude was all wrong, Dr. Goodhead declared. He noted that in Switzerland cancer mortality was reported as high, the only reason being that every cancer death there has officially reported as such. He felt the cancer death rate in Switzerland was no higher than in any other country.

Dr. Goodhead's last recommendation to the public was "avoid confusion between physical and chemical," and to physicians, he counseled "make a more thorough study of cancer symptoms so we can get patients in time and have them."

### Manitoba's New Radio Station

An Important Link In The Coast To Coast Net Work

An important link was added recently to the coast-to-coast network of the Canadian Radio Commission, when a new radio broadcasting station CKY Winnipeg officially came "on the air." The inauguration programme was heard over a large number of stations and marked a distinct step forward in the art of radio broadcasting. The transmitter of the new radio station is the most powerful in the Dominion and all the latest developments known to radio science have been utilized in its construction. The station is situated on a hill, not observed until its erection, the transmitting tower is on the principal horizon from which commenced the Dominion survey, and went, in 1870, and Manitoba has been the unique distinction of linking by radio Canada east and west from a historic site.

CKY is a provincial government enterprise, erected by the Manitoba Government. Telephone System. It brings Manitoba into a prominent place in Canadian radio broadcasting.

### Longest Regular Air Route

First Mail Service Australia-Croydon Arrives Ahead Of Time

The first regular air mail service from Australia reached Croydon airport three minutes ahead of the 12-day schedule for the 12,000-mile flight, the longest, regular air route in the world.

The two Imperial Airways planes carrying the mail brought a load of 1½ tons of which half a ton was from Australia and included a special air bag containing Christmas greetings and presents from the Duke of Gloucester, third son of the king, to members of the royal family.

The vivid red Palmistina which had to the colorful plant life of Florida and California were brought to the United States from Mexico.

It seems to be a fashion of the day to make the most of the time and do nothing about it.

A dictionary of guiding letters is to be published. It's complete it will be a boon.

## WHEN THE FRANCO-GERMAN COMMERCIAL AGREEMENT WAS SIGNED

Our picture, taken at the Quai d'Orsay in Paris, shows one of the members of the German delegation signing the Franco-German commercial agreement which was concluded recently. M. Laval, French Foreign Minister, who signed the pact for the French Government, is seated on the left.

### Brand Mark Always Seen

No Guessing Required When Buying Canadian Beef

It is no longer necessary for a person in Canada to be a judge of beef in order to be sure of getting the quality desired. The judging is now done for purchasers of graded beef under supervision of the Dominion Department of Agriculture, a thick stand in the field, to resist cold and show a better growth in shallow soils.

From further experimentation, at present delayed by lack of money, is required before it can be made available for commercial use.

The problem, roughly, was to develop a type which would combine the high quality hay and other virtues of the long-stemmed semi-lap grass with the virtues of the short-stemmed Dan. Dr. W. G. Mox, president of the university, stated: "We now have strains, fixed for spreading root and high seed yield, and have evidence that the product can be carried through to completion with confidence of achieving the results desired." Future study will deal with quantity of yield.

The spreading root in which the plant sends forth rhizomes or root extensions so that there is practically no limit to its range and hold on the soil, is the chief contribution to pasture. It will resist trampling and heaving of the land by frost.

### New Type Of Alfalfa

Developed By The University Of British Columbia

A new type of alfalfa has been developed at the University of British Columbia through crossing of the Grimm and Ontario varieties and the Russian Dan strains. It is expected to provide improved pasture, a thicker stand in the field, to resist cold and show a better growth in shallow soils.

From further experimentation, at present delayed by lack of money, is required before it can be made available for commercial use.

The spreading root in which the plant sends forth rhizomes or root extensions so that there is practically no limit to its range and hold on the soil, is the chief contribution to pasture. It will resist trampling and heaving of the land by frost.

### Poultry Plan Approved

Order-In-Council Is Passed Covering Three Prairie Provinces

An order-in-council was passed approving the scheme of the three prairie provinces to control the marketing of poultry under the Natural Products Marketing Act. The Toronto Globe said recently in a dispatch from the Ottawa correspondence: "During the last two years," the dispatch continued, "the Canadian poultry pool has been able to market in England 1,500,000 pounds of poultry annually, mostly turkeys, and it is stated farmers throughout Canada have benefited financially by reason of that amount being removed from the domestic market."

More than 42,000 motorcycles are in operation in Switzerland.

## WHEN BALDWIN DEFENDED HIS STAND ON INDIA'S CONSTITUTION

Here we see part of the vast gathering at Queen's Hall, London, when Conservatives from all parts of Great Britain attended the meeting of the Central Council to consider the Joint Select Committee's India proposals. It was during this meeting that Mr. Stanley Baldwin made the stirring speech which caused a large majority of his followers to approve the bill. In the picture we have numbered five prominent leaders who backed Mr. Baldwin, who is numbered (1). They are: (2) Mr. R. A. Amery, former Secretary of State for India; (3) Sir Samuel Hoare, Secretary of State for India; (4) Lord Irwin, former Secretary of State for India; (5) Lord Haldane, Minister of War; and (6) Lord Lansdowne, Secretary of State for Air.

## Autos Using Wood Fuel

"Gasoline" Cars Are Becoming Quite Common In France

The day may come—in fact it is here so far as Europe is concerned—when the driver of a car will glance at his fuel indicator and say, "I must pull up at the next filling station and take in 100 pounds of wood chips."

"Gasoline" is the name rarely heard for wood fuel drives automobiles which are already in service in large numbers in Germany, France, Switzerland, Italy, Sweden, Czechoslovakia, Hungary and other Balkan states, quite a formidable array of countries experimenting, although the process is really just the experimental stage. France has already held an exhibition of the new "gasoline" cars, the entries including a Ford truck equipped with the special generator needed to convert wood into motor fuel. There were 15 entries, among them passenger cars, buses and trucks capable of hauling up to eight tons. Italy is specializing in passenger tractors, and the city of Posenburg has no less than 100 cars that substantial progress has been made.

The new fuel is not made from high grade wood but forest slash, brushwood, sawdust or even woody weeds. But other products are being used in the new generators such as the "trash" that is left over after packing blais of cotton. The generator takes in 3,000 gallons coming from a 50-acre plantation, and it will also use the waste of coarser grain, such as corn, one ton of dry cornstalks yielding 100 gallons.

It is estimated that figures cited by Dr. O. W. Wilson of World Petroleum, a 40-horsepower truck will run about 60 miles on 75 pounds of brush wood.

To countries such as those named which have very limited sources of oil supply this is an interesting development. It may be that it will be the limit in an endeavor to make themselves less dependent on oil obtained from the East. It is doubtful that countries possessing vast oil resources will trouble much about the gasoline engine. Fifteen gallons of gasoline will run a car for 100 miles. It takes one acre of forest to furnish 125 gallons. Thus an acre would yield enough gas to last the average motorist three months. Italy, for example, would require 2,000,000 acres of forest for gas to last the average motorist three months. Italy, for example, would require 2,000,000 acres of forest for gas to last the average motorist three months. Italy, for example, would require 2,000,000 acres of forest for gas to last the average motorist three months. Italy, for example, would require 2,000,000 acres of forest for gas to last the average motorist three months.

### Cave Dinner For Charity

English Railway Company Limited Trains For "Standard" Journey

Two hundred and sixty people entered a train at Victoria station at 11:15 one night recently. When they stepped out of it, two or three hours later, they were still at Victoria Station.

Each passenger paid from \$5 to \$6 for the "standard" journey. The train, composed of Pullman cars, was headed by the Southern Railway for an evening party in aid of the Princess Elizabeth of York Hospital for Children, arranged by debutantes interested. The "fare" provided for many things not usually included in the price of a railway journey. For instance, there was supper—or breakfast.

In the past five years, Japan is estimated to have supplied from 60 to 70 per cent. of the world's raw silk, and China from 15 to 20 per cent.

### Always Of Interest

Things Pertaining To Earlier Days Should Be Preserved

The automobile is a thing of the present that it is difficult for our children to visualize a time when all traffic other than on foot, horseback or on horseback. Earlier days and their manners and implements almost are forgotten, and probably it would be difficult to gather together a complete set of the implements and the relics of pioneer days. We forget so quickly that one can scarcely realize what the first motor car looked like. Yet the early days should not be forgotten and it would be a good thing if we were to preserve a place where such relics of our earlier history might be viewed by the present generation.

(Quote Of The King)

His Majesty observed what has been an annual custom when two of the poorest men and women in Whitechapel district were his guests at a Christmas tea-party in Whitechapel on Christmas Eve 28. The King explained the custom when he was still Prince of Wales and has continued it every year since.

"These shoes I bought from you are too flimsy to walk in."

"Our establishment, madam, does not pretend to cater for pedestrians."

A new type of anesthetic is applied by injection into the blood stream.

Serious illness or death may result from the mistaking of half of the body by the sun's rays.

Utah has five mountain peaks, each more than 10,000 feet above sea level.

nouncements.

Tickets are selling rapidly for  
the Burns Concert to be held in  
Jordan Memorial school room  
on Friday evening of this week.  
A real good Scotch program is  
assured. Don't miss it.

Keep in mind the Burns Smo-  
kings concert in the Legion Club  
rooms on Saturday evening of  
this week. Program commences  
at 9 o'clock. Tickets \$1.00  
each. A good program is being  
prepared.

The bad roads for the past  
week have sowed up traffic on  
the highways considerably al-  
though they have improved  
slightly in the last two days.  
Trucks east and west have been  
forced to cancel several trips.

The Burns Concert being put  
on by the Ladies Aid of Gordon  
Memorial Church is postponed  
until next week, on account of  
the Ratepayers Meeting and the  
cold weather. Watch for  
change in posters.

The pancake feed held in Gor-  
don Memorial school room last  
Wednesday evening under the  
auspices of the Tuxis group was  
exceptionally well attended and  
all thoroughly enjoyed the feed.  
After looking over their balance  
sheet the boys were well pleased  
with the result of their venture.

M. P. H. Woderburn, former  
of Redcliff, who has been in  
the provincial debt adjustment  
department at Edmonton for  
several years, has resigned his  
position and is leaving shortly  
for south Africa where he will  
engage in future.

Keen competition featured  
the Whist and Bridge Tour-  
nament in the Parish Hall Wed-  
nesday Jan. 16 Mrs. Worts  
on the first prize at White and  
Mrs. Wyatt the consolation. In  
Judge Mrs. W. Pickering and  
first and Mrs. G. Myers th- con-  
solation. An enjoyable after-  
noon was spent.

## PHILCO RADIOS

A musical instrument of  
Quality, Sold and profes-  
sionally in 66 countries of the  
world.

BATTERIES, RADIOS &  
RADIATORS REPAIRED

T. ENNO  
Phone 2827 218 Railway St.  
MEDICINE HAT

A portion of the C. P. R. in  
British Columbia was buried  
under 65 feet of snow as a re-  
sult of a slide after a heavy  
snow fall.

Despite the bad roads a few  
car loads of local citizens took  
in the Little Theatre entertain-  
ment in Medicine Hat last evening  
and thoroughly enjoyed the  
three one-act plays.

With improved prices creat-  
ing a market in the United  
States first shipment of cattle  
since 1930 comprising 97 has  
been assigned to Spokane. Local  
cattle yards are planning further  
 shipments.

A Jamboree of the Boy Scouts  
of southern Alberta will be  
staged on or about April 22nd  
when the Chief Scout, Lieut-  
General Lord Baden Powell and  
Lady Baden-Powell will be  
present.

The new bank of Canada is  
now getting down to business.  
The first annual meeting of  
shareholders is being held today  
when the seven directors will  
be elected and the directors' fee  
decided upon. The statute  
provides a maximum of \$20,000  
annually for that purpose.

Rt. Hon. McKenzie King, Lib-  
eral leader in the federal house  
surprised parliament in his ad-  
dress in reply to the speech  
from the throne by offering his  
support to such measures as  
those providing for unemploy-  
ment insurance, old age pen-  
sion in revised form, and new  
company incorporation laws.

Notice of Annual  
Meeting

Public notice is hereby given  
that a meeting of the electors  
of the Town of Redcliff will be  
held in the Cliff hall on Friday  
the 25th day of January 1935  
at 8 o'clock P. M. for the pur-  
pose of receiving the report of  
the Mayor, Secretary/Treas-  
urer and chairman of the vari-  
ous committees of Council for  
the year ending December 31st  
1934.

Dated at Redcliff, Alta. this  
16th day of January 1935.

F. E. L. Britt Sec. Treas.
